Bilal Ahmed

Senior IP/MPLS/SRv6 Engineer - Ufone Telenor Merger@ Huawei
Technologies
Islāmābād, Pakistan

Summary

Introduction:

An enthusiastic network engineer with the necessary drive and determination needed to resolve complex networking issues. Looking for a new and challenging position, one which will make best use of my existing skills and experience and also further my development. Skilled in Huawei/Cisco/Juniper Networking, Microsoft office. Strong network professional with a BS Telecommunication Engineering focused in Networking from COMSATS Institute of Information and Technology.

Expertise:

Planning, Implementation and Troubleshooting of SRv6, MPLS, MPLS-MPBN, IPRAN, IPCORE, EVPN, L2/L3 IP/MPLS BGP VPNs. Configuration and Troubleshooting of Routing Protocols IGRP, OSPF, BGP, IBGP, EBGP, MPLS.

Configuration and Troubleshooting of L2 Protocols VLAN, VTP, STP, RSTP, VLAN Trunking.

Deployment, Integration, Maintenance and Troubleshooting of Routers, Switches and Firewalls.

IP addressing and subnetting – implementing & designing a new network.

Understanding of LAN/WAN technologies i.e. copper and Optical. Link and device Aggregation technologies i.e. Eth-Trunk and M-LAG. Service Layers including IP-SLA/NQA, BFD, DNS, NTP, DHCP. VRRP, HSRP.

Evaluating emerging technologies, performing proof of concepts, architectural analysis, documenting recommendations/strategies and best-practices.

Good understanding of MPLS, Layer 2 VPN, Layer 3 VPN, MPLS, MPLS Inter AS Option A B and C.

Certifications:

HCIE (Routing &Switching) Written

HCIP (Routing & Switching)
HCIP (Carrier IP)
CCNA (Routing & Switching)
HCIA (Routing & Switching)
HCIA (Security)
HCIA (Cloud Computing)
JNCIA (Cloud)
FORTINET NSE-1 & 2

Experience

Huawei

IP Datacom Engineer (SRv6/MPLS) -

February 2020 - Present (6 years 8 months)

Pakistan

As IP Datacom Team Leader & Senior Technical Expert, Responsible for technical design and end to end delivery of IPCore and IPRAN projects involving IP/MPLS/SRv6 Network products of Huawei Technologies.

>>Current Project:

** Ufone-Telenor Merger Project 2026** - Merger of Ufone and Telenor Pakistan IPCore and IPRAN Networks

1-Network Documentation(LLD, HLD, MOPS, Port Mappings & IP planning etc.)

2-Network Expansion: Board and Link Expansion on PE & DCGW Routers Interlinks, Core L3-Switches, EORs and TORs Uplinks and Downlink etc.

3-MoRAN Migration: Ufone-Telenor "Multi-Operator-RAN" Migration on New Point of Interconnect from Analysis, Planning, Scripting, MOP, Implementation and Troubleshooting. Karachi-Islamabad-Quetta

4-MoCN Communication Matrix Implementation: Ufone-Telenor "Multi-Operator-Core-Network" 2G,3G and 4G Services Communication Matrix Implementation. Including Analysis, Planning, Scripting, MOP, Implementation and Troubleshooting.

5-CBS & EVC Communication: Convergent Billing System Communication Matrix Establishment and Troubleshooting Between Ufone and Telenor Core Networks. Provided Inter-Region Redundancy for failover scenarios.

6-P & PE Router SWAP: Analysis, Portmapping, Scripting, CFG File creation and Implementation of P and PE Router SWAP.

>>Previous Projects:

****PTCL IP-EDGE Transformation Project**** - PTCL IP Core Network Migration from MPLS to SRv6-BE and SRv6-TE

Worked as Team Lead and IP Datacom Engineer, delivery work included:

1-IP/MPLS/SRv6 Network Planning and Network Operations.

2-Network Deployments and Configurations.

3-Version upgrade, expansions, SRU/SFU upgrade, Routers/switches Swaps/Traffic Migrations.

4-Core traffic shifting, working on core RRs, P, PEs both in MPLS/SRv6 IP core and IPRAN.

5-Solution Design/Implement Core Protocols including IP/MPLS/SRv6 Core, IGP(OSPF), BGP, MP-BGP, IPv4, L3/L2 redundancy protocols.

6-Implementation of Transport Technologies i.e MPLS/SRv6 (L3VPN, L2VPN, EVPN, LDP/RSVP, VPLS, L2VC)

Cyber Internet Services Pvt. Ltd.

IP Network Engineer

September 2015 - February 2020 (4 years 6 months)

Islamabad

1-Infrastructure Management: Managed wide area networks (WAN) and enterprise client environments across hybrid transport media including Optical Fiber (MPLS), P2P Wireless, 4G, and Satellite links.

2-Multi-Vendor Deployment: Installed, configured, and maintained multi-vendor routing and switching infrastructures using Cisco, Juniper, Huawei, and MikroTik platforms.

3-Secure Overlay Networks: Designed and deployed secure site-to-site cryptographic tunnels utilizing GRE, IPsec, and DMVPN architectures.

4-Network Security: Formulated and enforced firewall security policies, zone configurations, and access controls on Fortinet (FortiGate) and Juniper platforms.

5-Routing & Switching Optimization: Deployed and optimized core networking protocols including Static/Dynamic Routing, OSPF, BGP, STP, VLANs, and MPLS L2/L3 VPNs.

6-Proactive Operations: Handled real-time network monitoring, performance analysis, and incident remediation for NMS alerts to ensure strict SLA compliance.

7-Project Delivery & Lifecycle: Spearheaded high-level project planning and configuration baselines, while standardizing documentation and databases for corporate links.

8-Stakeholder Coordination: Directed physical infrastructure deployment through 3rd-party engineering partners and coordinated directly with client technical teams.

PTCL

Optical Transmission Engineer

June 2013 - February 2015 (1 year 9 months)

Pakistan

1. Network Operations: Looked after the daily operation, maintenance, and troubleshooting for ITR SDH and DWDM networks.
2. Link Provisioning: Configured and turned up E1 and high-capacity links (STM-1, STM-4, STM-16, and STM-64) cross-connects based on official work orders.
3. NMS Monitoring: Monitored the network, isolated faults, and cleared alerts daily using Huawei (U2000/T2000), ZTE (Unitrans), and Fiberhome NMS platforms.
4. Fiber Access: Worked directly with optical fiber access technologies, including GPON and Metro Fiber networks.
5. Troubleshooting Tools: Used OTDRs, Optical Power Meters, and Visual Fault Locators (VFL) to test links, check fiber health, and pinpoint exact fault locations.
6. Fiber Cut Restoration: Handled emergency fiber cuts by physically shifting links and moving optical patches at the ODF inside PTCL Exchanges to restore traffic quickly.
7. Team Coordination: Fixed complex transmission issues through hands-on troubleshooting and by working closely with internal technical teams.

Education

COMSATS University

BS Electrical (Telecom) Engineering, Telecommunications

Engineering · (2008 - 2012)
